TEACHING MATERIAL GUIDANCE

1. Title of the material

UJEP, Modal split and factors influencing transport mode choice

Link

2. Which section of the SUMP it is relevant to?

This material mainly covers the analysis part of the SUMP cycle, especially part 3 "Analyse mobility situation".

3. Problem approached and content overview

The presentation introduces indicators used in connection with transport. It is mostly focused on modal split, which represents a commonly used indicator. It is shown, how to determine modal split and where to find information about it. In addition to that, main barriers and benefits connected with the modal split use are mentioned. As modal split is an indicator, which determine a transport modes use, the presentation also gives a short insight into factors influencing transport mode choose.

4. Who could be interested in this material?

The material is intended to be used especially at universities. As the material brings essential information about analysing mobility situation, it could be useful for policy makers and people interested in transport topics as well.

5. What is worth mentioning as an innovative factor for the reader?

The information about indicators of mobility situations is introduced clearly and shortly. The material demonstrates examples of indicators and their presentation. It also sums up main factors influencing transport behaviour.

6. Limitations

The material briefly introduces main indicators used in connection with transport. However, it mostly elaborates on the modal split as it is the commonly used one.
